Professional Summary

Dynamic and results-driven software developer with a passion for building innovative, scalable applications. Proficient in full-stack web development, with a strong foundation in problem-solving. Dedicated to continuous learning and collaborating on impactful projects to drive technological advancements.

Technical Skills

Languages: JavaScript (ES6+), TypeScript, Python, C++, Java, HTML5, CSS3

Frameworks & Libraries: React.js, Node.js, Express.js, .NET MVC, LangChain, Tailwind CSS, Bootstrap, jQuery

Databases: MongoDB, MySQL, SQL Server (SSMS), QdrantDB

Cloud & DevOps: AWS (S3, Lambda, EC2), Git, GitHub, Postman, Vercel

AI & ML: Google Gemini API, Retrieval-Augmented Generation (RAG), Vector Embeddings, Generative AI

Core CS Concepts: Data Structures & Algorithms, OOP, DBMS

Experience

Origent Technologies

Software Analyst Intern

Kolkata, India

Jan 2026 – Jun 2026

- Developing and maintaining production-grade enterprise web application features using **ASP.NET MVC**, **jQuery**, and **Bootstrap** for multiple internal business teams.
- Designing and optimising relational schemas and SQL Server stored procedures, improving query performance and data integrity across key modules.
- Delivered bug fixes, feature enhancements, and UI improvements in collaboration with senior engineers.

Projects

PrepMaster – Online Exam & Test Management Platform | C#, ASP.NET MVC 5, SQL Server, Bootstrap | [GitHub](#)

- Engineered a multi-role exam platform supporting student and teacher workflows with full-screen proctored sessions, auto-save progress, and role-based access control backed by SQL Server stored procedures.
- Built real-time analytics dashboards with subject-wise performance graphs and graphical result tracking for teachers to monitor class-wide progress.

FICMH – Full-Stack Website for Miranda House | React.js, Node.js, TypeScript, Express.js, MongoDB | [fichm.vercel.app](#)

- Designed and deployed a production full-stack website with a dedicated admin portal featuring comprehensive admin management controls for content, users, and listings.
- Implemented JWT-based authentication, RESTful API design, and modular component architecture with clean separation of concerns across decoupled TypeScript frontend and backend services.

Velo – Email Queue Management Application | React.js, Node.js, Express.js, RabbitMQ, MongoDB | [GitHub](#)

- Built a full-stack email campaign platform where users can create campaigns and dispatch bulk emails to brands or multiple recipients, with RabbitMQ handling asynchronous message queuing to ensure reliable, ordered delivery at scale.
- Designed a React dashboard for campaign creation and status tracking, backed by an Express.js API and MongoDB for campaign and recipient data persistence.

Education

B.P. Poddar Institute of Management and Technology

Bachelor of Technology, Information Technology

Kolkata, India

2022 – Present

Douglas Memorial Higher Secondary School

Senior Secondary (ISC) & Secondary (ICSE)

Kolkata, India

2021 & 2019

Certifications & Achievements

- Meta Certified:** Programming with JavaScript — Meta / Coursera
- Cisco:** Introduction to Modern AI — Cisco Networking Academy
- Postman API Fundamentals Student Expert** — Postman
